

# Kii™ Dissecting Balloon Access Systems

## SETUP GUIDE

**1** Insert the introducer until the introducer and seal are locked into place.

**2** Insert the dissecting balloon into the incision site with the inflation port perpendicular to the abdomen.

**3** Remove the introducer.

**4** Insert a 10mm endoscope.

**5** Connect the inflation bulb, and twist the Luer lock connector clockwise onto the stopcock until firmly attached.

**6** Inflate the dissecting balloon under visualization by compressing the inflation bulb.

**7** After completing dissection, untwist the Luer lock connector counterclockwise, and disconnect the inflation bulb.

**8** Remove the endoscope for complete balloon deflation.

Kii dissecting balloon access systems are used in laparoscopic surgery for tissue separation of the extraperitoneal space.

Devices listed must be administered by a healthcare professional. Please contact your Applied Medical representative for more information on availability.
